(54) Title: **DISTRIBUTOR UNIT FOR LIQUID SUBSTANCES**

(57) Abstract: Distributor unit, comprising a reservoir (7) containing a liquid substance, an anilox cylinder (8) and a cliché cylinder (9) onto which is movably fitted a cliché jacket (18), the reservoir (7), the anilox cylinder (8) and the cliché cylinder (9) being movable from and to a cylinder (2) on which travels a web-shaped material (3) which has to receive said substance, the distributor unit having an operator side and a transmission side, said anilox cylinder (8) and said cliché cylinder (9) being held by corresponding supports on operator side (14, 15) and on transmission side (16, 17), a device (19) for locking the cliché cylinder in cantilever position when the corresponding cliché jacket (18) has to be substituted, said device being associated to the support on transmission side (17) of the cliché cylinder (9), characterized by the fact that the support on operator side (15) of the cliché cylinder (9) comprises a first and a second element (150, 151) automatically movable from and to the cliché cylinder (9), which elements in configuration of use hold the cylinder (9) on the operator side and in configuration of substitution of cliché jacket (18) are reciprocally spaced disengaging the operator side of the cliché cylinder (9).
